waraswami and Anandesvaraswami, as well as to the river bank, and the reply of Government was that no water would be supplied to the holders of that land unless they made provision for the safety and protection of the temples and the bank. Having planted Kodasale reeds along the bank, they have since resumed the cultivation of the site. This has in no way ensured the safety of the temples. The banks on both sides of the river may therefore be strengthened so as to prevent any damage being caused to the temples in question and to the bathing ghat, &c., on the opposite side of the river.

Reply of Government.—The Deputy Commissioner will personally inspect the spot and see that a margin is left with a good pukka wall built at the expense of the landholder; otherwise no water should be given. The groin said to have been built by Alasingrachari should also be inspected and a report submitted to Government on both the above points.

Subject No. 459
Restoration of tasdik to Vyasarayaswami Matt.

Summary of discussion.—The monthly and annual tasdik allowed to the Vyasarayaswami Matt at Sosale has been withheld on the ground that no accounts of receipts and expenditure of the money were rendered to Government. The grants may be restored and the money hitherto withheld treated as savings. Proper arrangements may be made for the continuance of worship in the Matt and for the feeding of Brahmins, &c., so that the charity founded by the late Maharaja may be perpetually continued.

Reply of Government.—Arrangements have been made for ensuring the continuance of worship, feeding, Aradhane, &c. The money will not be spent otherwise than on repairs and other improvements of the Matt.

Subject No. 460
Establishment of a Munsiff's Court.

Summary of discussion.—The desirability of establishing a Munsiff's Court at Tirumakudlu-Narsipur, is again urged. The number of suits filed, the adjournments ordered, the time occupied in the final disposal of cases, and the money spent by the parties in these parts, may be taken into consideration by Government.

Reply of Government.—Noted.

Subject No. 461
Injury done to lands and crops by the overflow of channels.

Summary of discussion.—Remission of assessment may be granted whenever injury is done to cultivated lands and crops by the overflow of channels. The recent overflow of the Ramaswami nala at the 2nd furlong of the 22nd mile has been the cause of great damage to crops. The grievances of the raiyats in this respect are real and deserve some remedy.

Reply of Government.—The Deputy Commissioner will enquire into this representation, inspect the locality named and do the needful.
